SKILLS

- C/C++ & Python
- React Native & Node.js
- SQL Databases
- Node-RED & OPC UA
- Git & GitHub
- Logic & Algorithms
- Web & Mobile Development
- Teamwork

LANGUAGES

- Spanish (Native)
- English (Advanced C1 - Busuu Certified)

PROFILE

Bilingual software developer and engineering student with hands-on experience in backend, frontend, and industrial automation. National competitive programming finalist (ICPC). Focused on building scalable applications, integrating databases, and optimizing processes for technical decision-making.

WORK EXPERIENCE & PROJECTS

Grupo PiSA OCT 2026

Automation Developer (Internship)

- Designed and implemented Node-RED flows to extract 96 variables via OPC UA protocols distributed across 16 packaging lines.
- Developed a production dashboard integrating variable readings and automated storage into SQL databases.

University Project AUG 2024 - DEC 2024

Programming Assistant

- Collaborated on developing a Python system for the bulk handling and processing of CSV files.
- Implemented data reading, filtering, and graph generation functions to optimize data visualization and analysis.

Independent Projects / ICPC Mexico 2024 - PRESENT

Web & Algorithm Developer

- MelodyLog: Ongoing development of an interactive web platform focused on publishing and managing music reviews.
- ICPC Competition: Continuous resolution of complex algorithmic problems and code optimization in timed environments.

EDUCATION

B.S. in Electronics and Computing Engineering 2022 - PRESENT

University of Guadalajara (CUValles)

Technical Baccalaureate in Programming Graduated: MAY 2022

CETIS #161
